Intuiface: A NEW WAY TO EXPERIENCE R.U.S.E.

Posted: 09-06-2009 | 03:27:53

Category: Console Gaming

Developed by Eugen Systems, R.U.S.E is all set to revolutionize the strategy genre. Ubisoft demonstrated this brand new real-time strategy game at their booth during E3, using 'Intuiface', the new and innovative surface computing platform designed by IntuiLab.

R.U.S.E features cutting edge graphics and effects, the incredible IRISZOOM Engine, immersive combat and a simplified interface that allows you to determine your nation's strategy to defeat your enemies. R.U.S.E introduces deception techniques that will let you bluff your enemy to lead your nation's army to victory. You're able to change the camera view to pull back to a large war-room overview or zoom down to a bale of hay on the battlefield. This is all done with multitouch sweeps and on-screen gestures drawing rings around units and sending them into battle with the help of Intuiface. R.U.S.E will bring strategy gaming to an unprecedented level of depth with unique gameplay mechanics based on bluff and deception.

Ubisoft announced R.U.S.E for PC, XBOX 360 and PlayStation 3. Ubisoft, a leading producer, publisher and distributor of interactive entertainment products worldwide claims that The gigantic maps of R.U.S.E and fluid use of zoom to interact with the game combined with the abilities of surface computing will bring a totally new experience to players.
